COMMENTS				
The project is almost empty, I cannot see anything implemented there other than an /api/merhcandise which is technically meaningless at this point, where ist the rest of the code ? is that all ? No estimation report as well … The project structure is weird .. you have Controller folder and controllers folder ? where are the models and routes folders ? mmmmm that needs to be fixed really quickly I would assume the team couldn't integrate their work on the master branch ?
